

WEST CENTRAL RAILWAY

L.No:-W-4/W-HQ/501/TMC/01

Office of the General Manager
Engineering Branch,
JABALPUR-482001
Date: 16.01.2013

Sr.DEN/Co/JBP, BPL & KTT

Sub:- Working of track machines.

Ref:- PCE's Instruction.

With reference to above following instruction should be followed:-

- (i) Whenever any track machine is working in section, SSE/AEN/Sr DEN/DEN will record /analyse the rail levels and required lift should be worked out at alternate sleeper. Alignment on long chord to be measured and slew to be worked out at alternate sleepers.
- (ii) While tamping, if there is a bridge the tamping should not be done from other direction to end at bridge approach but to be started from bridge approach towards the curve (if any). In case direction of m/c is not favourable then the direction should be reversed.
